1. NATURE OF BUSINESS

NxGold Ltd. (the "**Company**" or "**NxGold**") was incorporated under the *Business Corporations Act* (British Columbia) on April 26, 2004. The Company's registered and records office is located on the 22nd Floor, 885 West Georgia Street, Vancouver, British Columbia V6C 3E8. The Company is engaged in acquiring and exploring early-stage mineral resource properties.

The Company is currently exploring mineral properties. During the three months ended March 31, 2019, the Company had a net loss of $487,059 and working capital of $3,171,089 as at March 31, 2019. The Company believes that it will have sufficient capital to operate over the next 12 months, however additional funding will be necessary to complete its earn in options on projects and fund other exploration activities (Note 7).

The Company has one 100% owned subsidiary, NxGold Australia Pty. Ltd. ("**NxGold Australia**"), which was incorporated in Australia on December 18, 2017. NxGold Australia owns 100% of Roe Gold Limited ("**RGL**").

These financial statements are prepared in accordance with International Financial Reporting Standards ("**IFRS**") appropriate for a going concern. The going concern basis of accounting assumes the Company will continue to realize the value of its assets and discharge its liabilities and other obligations in the ordinary course of business. Should the Company be required to realize the value of its assets in other than the ordinary course of business, the net realizable value of its assets may be materially less than the amounts shown in the financial statements. These financial statements do not include any adjustments to the amounts and classifications of assets and liabilities that may be necessary should the Company be unable to repay its liabilities and meet its other obligations in the ordinary course of business or continue operations.

2. BASIS OF PRESENTATION

Statement of Compliance

These condensed consolidated interim financial statements for the three months ended March 31, 2019, including comparatives, have been prepared in accordance with International Accounting Standard ("IAS") 34 Interim Financial Reporting. They do not include all of the information required by International Reporting Standards ("IFRS") for annual financial statements and should be read in conjunction with the audited financial statements for the fiscal year ended and as at December 31, 2018.

Basis of Presentation

These financial statements have been prepared on a historical cost basis, except for certain financial instruments which have been measured at fair value. In addition, these financial statements have been prepared using the accrual basis of accounting except for cash flow information. All monetary references expressed in these notes are references to Canadian dollar amounts ("$"). These financial statements are presented in Canadian dollars, which is the functional currency of the Company.

Critical Accounting Judgments, Estimates and Assumptions

The preparation of the financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities, and contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable in the circumstances. Uncertainty about these judgments, estimates and assumptions could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods.

2. BASIS OF PRESENTATION (continued)

Information about significant areas of estimation uncertainty considered by management in preparing the financial statements are set out in Note 2 to the audited financial statements for the fiscal year ended December 31, 2018 and have been consistently followed in preparation of these condensed consolidated interim financial statements.

3. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies followed by the Company are set out in Note 3 to the audited financial statements for the fiscal year ended December 31, 2018 and have been consistently followed in preparation of these condensed consolidated interim financial statements except for the following policies:

New Standards Adopted:

The Company has applied IFRS16 *Leases* ("IFRS 16") using the modified retrospective approach and therefore the comparative information has not been restated and continues to be reported under IAS 17 *Leases* and IFRIC 4 *Determining whether an arrangement contains a lease.*

For the purpose of applying the modified retrospective approach to its office lease, the Company elected to measure the right-of-use asset at an amount equal to the lease liability at the date of initial application . At January 1, 2019, the Company recognized a right-of-use asset (Note 6) and lease liability of $130,002 (Note 8) in respect of its office lease.

Policy applicable from January 1, 2019

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

- The contract involves the use of an identified asset
- The Company has the right to obtain substantially all of the economic benefits from the use of the asset throughout the period of use; and
- The Company has the right to direct the use of the asset.

As a lessee, the Company recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of the right-of-use assets are determined on the same basis as those of the property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

The lease liability is measured at amortized cost using the effective interest method.

The Company presents the right-of-use asset related to its office lease in property and equipment.

(Unaudited - Expressed in Canadian Dollars)

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Short-term leases and leases of low-value assets

The Company has elected not to recognize right-of-use assets and lease liabilities for short-term leases that have a lease term of 12 months or less and leases of low-value assets. The Company recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

4. ACQUISITON OF ROE GOLD LIMITED

In December 2017 the Company executed a binding term sheet (the "**Agreement**") with RGL and its shareholders to acquire an 80% interest in the Mt. Roe Gold Project ("**Mt. Roe**" or the "**Project**"), located in the Pilbara region of Western Australia. The transaction closed in January 2018.

Pursuant to the Agreement: (i) NxGold advanced to RGL, A$1.5million in December 2017; (ii) RGL used those funds to acquire an 80% interest in the Project and a special purpose vehicle ("**SPV**") formed by the shareholders of RGL acquired a 20% interest in the Project, all pursuant to the terms of an existing option agreement; (iii) in January 2018, NxGold acquired all of the issued and outstanding shares of RGL in exchange for 19 million common shares of the Company. The Project is held as a joint venture between RGL and the SPV pursuant to which the SPV is free-carried through to Bankable Feasibility Study with standard dilution applying after that. If the SPV's interest in the Project falls below 5%, the balance of its interest will be transferred immediately to NxGold. The SPV has been granted a US$20 per ounce royalty over the Project. An additional 760,000 shares were issued as a finder's fee. All of the shares issued were valued at $0.27 per share which was the closing price on the day the Agreement was executed.

5. MARKETABLE SECURITIES

Marketable securities consist of 279,791 common shares of NexGen Energy Ltd. ("**NexGen**"), a corporation with several common directors and officers, the common shares of which are listed on the Toronto Stock Exchange and NYSE American LLC. The carrying value is based on the estimated fair value of NexGen common shares and determined using published closing prices. The cost was $130,764.

(a) Kuulu Property

In October 2016, the Company entered into an earn-in agreement (the "**Kuulu Earn-In Agreement**") with Meliadine Gold Ltd. ("**MGL**") (amended and restated February 3, 2017 and having an effective date of January 17, 2017), to earn up to a 70% interest in the Kuulu Project (the "**Kuulu Project**") upon satisfaction of certain requirements. The Kuulu Project is located in the Kavilliq region of Nunavut.

Specifically, the Company has the right to acquire an undivided 50% interest in the Kuulu Project (the "**First Earn-In Option**") and the right to acquire an additional undivided 20% interest in the Kuulu Project (the "**Second Earn-In Option**") by incurring the expenditures and payments set out below:

To be spent by:	Minimum expenditure	Cash payment	Total
First Earn-In Option (50% undivided interest)			
January 17, 2018	$ 1,000,000	$ 75,000	$ 1,075,000

	$ 25,000,000	**$ 300,000**	**$ 25,300,000**

The Second Earn-In Option is also subject to delivering to MGL a bankable feasibility study on or before January 17, 2024. The Company may extend the delivery date for the bankable feasibility study for up to three additional one-year periods, upon payment to MGL of $2.5 million in cash for each such one-year extension. The Company may also extend the date for incurring any of the expenditures required by the Second Earn-In Option for an additional one-year period, at no additional cost.

In November 2017, the Company delivered a notice of force majeure to MGL suspending its obligations under the Kuulu Earn-In Agreement, due to the continued delay in the renewal of the existing Land Use Licences, KVL311B01 and KVRW12E01. As of the date of this report, the land use licences are yet to be renewed. The land use licences are the only outstanding permits for the Company's proposed exploration program at the Kuulu Project. The Company has paid the $75,000 and incurred approximately $800,000 of expenditures related to the first earn-in option required to be spent by January 17, 2018.

The Kuulu Property is subject to a 1% net smelter returns royalty and a 12% net profit interest royalty.

(b) Chicobi Property

During the second quarter of 2018 the Company gave notice to withdraw from the Chicobi project in order to focus its capital and effort on other projects. As a result, an impairment charge and other exit costs of $1,025,778 were recorded in the year ended December 31, 2018.

8. LEASE LIABILITY

Lease liability recognized on adoption of IFRS 16 on January 1, 2019	$ 130,002
Interest expense	1,600
Payments	(7,576)
Lease liability, March 31, 2019	124,026
Less Current portion	(32,094)
Long-term lease liability	$ 91,932

On January 1, 2019 the Company adopted IFRS 16 – *Leases* retrospectively with the cumulative effect on initially applying the standard recognized at the date of initial application (see Note 3).

The lease is for an office space lease that extends to May 31, 2023. The discount rate applied to the lease is 5%. See Note 6 for information related to the leased asset. In addition to the lease payments the Company pays $23,657 annually related to operating costs and realty taxes of the leased office space. This amount is reassessed annually based on actual costs incurred.

The Company has a Facilities and Shares Services Agreement ("NxGold Agreement") with IsoEnergy Ltd, a related company. Iso effectively sub-leases approximately 50% of its space to the NxGold in exchange for $2,525 per month. The NxGold Agreement can be terminated with 30-days' notice but is expected not to be terminated during the term of the lease.

(Unaudited - Expressed in Canadian Dollars)

9. SHARE CAPITAL

The Company's authorized share capital is an unlimited number of common shares without par value. All issued common shares are fully paid.

Common Shares

In January 2018 the Company issued 19,760,000 common shares related to the acquisition of RGL (see Note 4).

On June 15, 2018 the Company issued 23,725,143 units (the "**Units**") at a price of C$0.18 per Unit for net proceeds of $3,975,947. Each Unit is comprised of one common share of the Company (a "**Common Share**") and one common share purchase warrant (a "**Warrant**"), each Warrant entitling the holder thereof to acquire one Common Share at a price of C$0.27 until June 15, 2021.

In connection with the offering, the Company paid the finders a cash fee up to 7.0% of the gross proceeds raised by the finders and finders were granted 1,186,356 common share purchase warrants (the "**Finder Warrants**") entitling them to subscribe for that number of Common Shares equal to up to 7.0% of the aggregate number of Units sold by the finders. Each Finder Warrant is exercisable at a price of C$0.18 until June 14, 2021.

Number of options exercisable	3,994,668	$ 0.40

As at March 31, 2019, the Company has stock options outstanding and exercisable as follows:

Number of options	Exercise price per option	Number of options exercisable	Exercise price per option	Remaining contractual life (years)	Expiry date
2,400,000	$ 0.52	2,400,000	$ 0.52	2.8	February 1, 2022
250,000	$ 0.45	166,668	$ 0.45	3.1	April 25, 2022
4,200,000	$ 0.20	1,428,000	$ 0.20	4.4	August 8, 2023
6,850,000	$ 0.32	3,994,668	$ 0.40		

The options granted vest one-third annually with 34% vesting immediately. The Company uses the Black-Scholes option pricing model to calculate the fair value of granted stock options. The model requires management to make estimates, which are subjective and may not be representative of actual results. Changes in assumptions can materially affect fair value estimates. There were no options granted in the three months ended March 31, 2019.

Share-based compensation for options in the three months ended March 31, 2019 amounted to $115,639 (2018 - $93,757) of which $102,450 (2018 – 81,417) was expensed to the statement of loss and comprehensive loss, and $13,189 (2018 – $12,340) was capitalized to exploration and evaluation assets (Note 7).

10. MANAGEMENT OF CAPITAL

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company’s management to sustain future development of the business. The Company defines capital that it manages as share capital, cash and marketable securities.

The properties in which the Company currently has an interest are in the exploration stage. As such, the Company has historically relied on the equity markets to fund its activities. Although the Company has been successful in raising funds to date, there is no assurance that the Company will be successful in obtaining required financing in the future or that such financing will be available on terms acceptable to the Company. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

13. FINANCIAL INSTRUMENTS (continued)

Credit risk

Credit risk is the risk of an unexpected loss if a counterparty to a financial instrument fails to meet its contractual obligations. The credit risk associated with cash is believed to be minimal as cash is on deposit with Canadian banks that are believed to be creditworthy. Amounts receivable is comprised primarily of amounts due from the Government of Canada and Quebec. The Company does not believe it is exposed to significant credit risk.

Liquidity risk

Liquidity risk is managed by ensuring sufficient financial resources are available to meet obligations associated with financial liabilities. The Company manages its liquidity by continuously monitoring and forecasting cash flows from operations and anticipating any investing and financing activities.
